

Club Car - Charge Indicator Light

Excel System vehicles with the ERIC Charging system feature a dash mounted charge indicator light below the steering column that serves two functions: 1) Battery low state of charge warning, and 2) Charging confirmation.

Battery Low State of Charge Warning

- The light comes on and remains solid when the battery state of charge falls below 20%.
- The light begins flashing when the battery state of charge falls below 10%.

Charging Confirmation

- The light will flash three times and the reverse buzzer simultaneously will sound three times to indicate a battery charging session has begun.

E.R.I.C. - Charge Status Indicators

Charge Cycle Complete -

Verification of a completed charge cycle must be confirmed by viewing the status indicator lights on the ERIC charger.
